TAMLIN M. PAVELSKY

CURRICULUM VITAE

UNC Department of Geological Sciences **Phone: 919.962.4239**
104 South Rd., CB 3315 **e-mail: pavelsky@unc.edu**
Chapel Hill, NC 27599

EDUCATION

Ph.D.	University of California Los Angeles, Department of Geography	6/13/2008
M.A.	University of California Los Angeles, Department of Geography	6/11/2004
B.A.	Middlebury College, Department of Geography	5/27/2001

PROFESSIONAL EXPERIENCE

Professor *July 2021 – Present*
Department of Earth, Marine and Environmental Sciences
University of North Carolina, Chapel Hill

Professor *July 2020 – June 2021*
Associate Chair *January 2019 – June 2021*
Associate Professor *July 2015 – June 2020*
Assistant Professor *July 2009 – June 2015*
Department of Geological Sciences
University of North Carolina, Chapel Hill

U.S. Hydrology Science Lead *December 2013—Present*
NASA Surface Water and Ocean Topography (SWOT)
Satellite Mission

Postdoctoral Researcher *August 2008 – June 2009*
Department of Atmospheric and Oceanic Sciences
University of California, Los Angeles
Mentor: Dr. Alex Hall

HONORS, AWARDS, AND FELLOWSHIPS

2019	Water Resources Research Editor's Choice Award (for Yamazaki et al., 2019)
2019	Water Resources Research Editor's Choice Award (for Lin et al., 2019)
2018	Make Our Planet Great Again Court Sejour Award, Government of France
2014	Presidential Early Career Award for Scientists and Engineers (PECASE)
2012	NASA New Investigator Award (Equivalent to NSF CAREER)
2012	UNC Junior Faculty Development Award
2011	UNC Department of Geological Sciences Walter H. Wheeler Undergraduate Teaching Award

2007 UCLA Dissertation Year Fellowship
2006 UCLA Department of Geography Outstanding Student Research Publication Award
2002 NASA Earth Systems Science Fellowship (Equivalent to NSF GRFP)

TEACHING EXPERIENCE (LAST 5 YEARS)

Term	Course No.	Title	Enrollment
2021 Fall	ENEC324	Water in our World	53
2021 Spring	GEOL508	Global Hydrology: Remote Sensing of Water	13
2020 Fall	ENEC324	Water in our World	60

2020 Spring	GEOL580	Writing Grant Proposals	6
2019 Fall	ENEC324	Water in our World	48
2019 Spring	ENEC324	Water in our World	55
2018 Spring	GEOL508	Global Hydrology: Remote Sensing of Water	8
	GEOL701	Graduate Seminar in Earth Surface Processes	5
2017 Fall	ENEC324	Water in our World	49
	GEOL701	Graduate Seminar in Earth Surface Processes	6
2017 Spring	GEOL508	Global Hydrology: Remote Sensing of Water	13
	GEOL701	Graduate Seminar in Earth Surface Processes	5
2016 Fall	ENEC324	Water in our World	48
	GEOL701	Graduate Seminar in Earth Surface Processes	6

THESES SUPERVISED (In progress in *italics*)

Julianne Davis (Ph.D. in Geology, expected 2024): focused on modeling and remote sensing of sediment processes in northern rivers.

Theodore Langhorst (Ph.D. in Geology, expected 2023): focused on remote sensing of erosion, deposition, and sediment transport in rivers.

Wayana Dolan (Ph.D. in Geology, expected 2023): focused on understanding the dynamic evolution of deltas in the Arctic using remote sensing.

Marissa Dudek (M.S. in Geology, expected 2022): focused on understanding distributions of craters on inner solar system planets

Angélica Gómez (Ph.D. in Geography, 2021): "Effects of Extensive Agriculture on the Hydrologic Cycle in the Tropical Lowlands," co-advised with Erika Wise

Simon Topp (Ph.D. in Geology 2021): "Multidecadal remote sensing of inland water dynamics"

Arik Tashie (Ph.D. in Geology, 2020): "Estimating the effective hydraulic properties of the subsurface and their spatiotemporal response to climate using a modified streamflow recession analysis."

Sarina Basile (M.S. in Geology, 2020): "Monitoring change in lake water storage over time using satellite imagery and citizen science"

Theodore Langhorst (M.S. in Geology, 2019): "Anticipated improvements to water surface DEMs from the Surface Water and Ocean Topography mission"

Wayana Dolan (M.S. in Geology, 2019): "Detecting Patterns and Drivers of Ice On and Ice Off Timing in Alaskan Rivers Wider than 150 m Using MODIS"

Aidan Buie (B.S. Honors Thesis in Geology, 2019): "An Analysis of Martian Crater Mineralogy and Morphology Using CRISM Imagery"

Ekaterina (Katia) Lezine (B.S. Honors Thesis in Environmental Science, 2019): "Evaluating North American Mountain Snowpack Extent in Regional Climate Models Using MODIS Satellite Imagery"

Elizabeth H. Altenau (Ph.D. in Geology, 2018): "Analysis of Surface Water Dynamics Along the Tanana River, AK Using In Situ Observations, AirSWOT Measurements, and Hydrodynamic Modeling"

George Allen (Ph.D. in Geology, 2017): "Global Abundance and Morphology of Rivers and Streams"

Natan Holtzman (B.S. Honors Thesis in Geology, 2016): "Predicting Lake Depths from Topography to Map Global Lake Volume"

Arik Tashie (M.S. in Geology, 2016): "Identifying Long Term Empirical Relationships Between Storm Characteristics and Episodic Groundwater Recharge"
Eric Barefoot (B.S. Honors Thesis in Geology, 2016): "Dynamic Stream Width Distributions in a Headwaters Catchment"
Sarah Cooley (B.S. Honors Thesis in Geology, 2015): "Detection and Analysis of Arctic River Ice Breakup Patterns from Daily Satellite Imagery"
Kevin Quinlan (M.S. in Geology, 2014): "Controls on Fluvial Geomorphology in the Canadian Rocky Mountains"
Zachary Miller (M.S. in Geology, 2013): "Quantifying river form variations in the Mississippi Basin using remotely sensed imagery"
Melissa Wrzesien (B.S. Honors Thesis in Environmental Science, 2013): "Validation of Snow Cover Fraction for Regional Climate Simulations in the Sierra Nevada"
Gabriel Parrish (B.S. Honors Thesis in Geology, 2012): "Strontium Isotope Compositions of Water and Hydrology of the Peace-Athabasca Delta, Canada: A Geochemical Approach"
Colleen Long (M.S. in Geology, 2012): "Remote Sensing of Suspended Sediment Concentration and Hydrologic Connectivity in a Complex Wetland Environment"

POSTDOCTORAL RESEARCHERS MENTORED

Angélica Gómez, 2021-Present
Jing Wang, 2021-Present
John Mallard, 2020-Present
Chao Yang, 2019-Present
Elizabeth Altenau, 2018-Present
Xiao Yang, 2017-Present
Arik Tashie, 2021 now postdoc at U. Alabama
John Gardner, 2018-2020 now assistant professor at U. Pittsburgh
Melissa Wrzesien, 2018-2020 now research scientist at NASA GSFC
Shuai Zhang, 2017-2020 now postdoc at U. South Florida
Matthew Ross, 2017-2018 now assistant professor at Colorado St. U.
Christine Lion, 2014-2016 now senior geospatial scientist at PSM, Australia
Deniz Kustu, 2011-2012 now report manager, BESST, Inc., California
Stefan Sobolowski, 2010-2011 now research professor, Bjerknes Centre, Norway

EXTERNALLY FUNDED GRANTS AND CONTRACTS

Total funding: As PI: $5,385,553 As Co-I: $28,014,545(to Pavelsky: $2,164,895)

(Co-I) NASA Science of Terra, Aqua, and Suomi NPP $682,714 (UNC: $185,443)
CoReSSD: A Cold Regions Snowpack and Snowfall Dataset constrained by Earth Observations for Continental Scale Snow Hydrology Science (PI: M. Durand, Ohio State; Co-Is Pavelsky, M. Wrzesien and S. Kumar, NASA GSFC) This grant aims to develop and validate a new snowpack dataset for North America that fuses MODIS satellite imagery and numerical model output.
Dates Active: 12/1/2021-11/30/2024
Pavelsky Effort: 2.1%/yr

(Co-I) NASA Commercial SmallSat Data Analysis Program $193,974 (UNC: $34,005)

Evaluation of SmallSat Data for Mapping Surface Water Resources (PI: L. Pitcher, U. Colorado; Co-Is Pavelsky, S. Cooley, U. Oregon) This grant will use field measurements of inundation extent to evaluate how well commercial satellite imagery can be used to map water surfaces in a range of different conditions, including braided rivers and wetlands. Dates Active: 7/1/2021-12/31/2022
Pavelsky Effort: 2.1% total over 2021, 2022

(PI) NASA SWOT Science Team $895,675
Integration of A Priori Datasets, Validation, and First Science Returns from the SWOT Satellite Mission (PI: Pavelsky). This grant funds continued work as the hydrology science lead for the SWOT mission, with a particular focus on using optical satellite imagery to improve SWOT hydrology products in the areas of river ice detection, river discharge, and monitoring of inundation extent in rivers and lakes. Dates Active: 6/1/2021-5/31/2025
Pavelsky Effort: 30.8% effort in 2022-2025

(Co-I) NASA Terrestrial Hydrology Program $611,392 (UNC: $80,757)
Towards global flooding dynamics in near real-time: a multi-sensor fusion approach based on public domain time-series of optical and radar data (PI: M. Tulbure, NCSU; Co-I Pavelsky) this grant will create a fusion data product for flood monitoring from optical and radar satellite imagery. The UNC portion of the project will focus on validating the data product using field data and high-resolution airborne remote sensing. Dates active: 7/1/2021-6/31/2024
Pavelsky Effort: 2.1%/yr in 2022-2024

(PI) NASA Citizen Science for Earth Systems Program $359,886
Lake Observations from Citizen Scientists and Satellites: Validation of Satellite Altimetry to Support Hydrologic Science (PI: Pavelsky; Co-Is F. Hossain, UW, S. Ghafoor, TTU) This grant funds research using measurements of lake water levels collected by citizen scientists to validate satellite measurements lake elevation and water storage. Dates Active: 6/25/2021-12/24/2022
Pavelsky Effort: 4.2% in 2021, 2.1% in 2022

(Co-I) NASA Earth Ventures: Suborbital $15,000,000 (UNC: $351,091)
Delta-X: Enabling Deltas to Thrive in a Century of Rising Seas
(PI: M. Simard, NASA JPL, Pavelsky one of many Co-Is) This proposal aims to understand the vulnerability of river deltas to sea level rise. It uses multiple NASA airborne sensors to understand the transport of water through river deltas and how those deltas are likely to thrive or fail. Dates Active: 5/21/2019-5/20/2023.
Pavelsky Effort: 8.3%/yr 2020, 2021; 4.2% 2022

(Co-I) NASA Terrestrial Ecology Program $914,579 (UNC: $263,361)
Crossing the divide: Inundation drives hotspots of carbon flux (PI: D. Butman, U. Washington) This grant focuses on understanding the relationship between terrestrial hydrology and the carbon cycle in the Arctic. Preliminary evidence suggests that inundated margins of lakes may be hotspots of methane emission, and we will seek to test this hypothesis using remote sensing and field studies. Dates Proposed: 2/1/2019-1/31/2022

Pavelsky Effort: 4.2%/yr

(PI) NASA/Jet Propulsion Laboratory $437,309
SWOT Algorithm Definition Team Hydrology Activities for A Priori River Database Phase 3 (PI: Pavelsky) This contract funds ongoing development of a global river database that is central to algorithms and data products for the NASA Surface Water and Ocean Topography (SWOT) Satellite Mission. Dates Active: 10/1/2018-9/30/2022
Pavelsky Effort: 2.1%/yr

(PI) NASA Citizen Science for Earth Systems Program Implementation Phase $1,476,564
Tracking Water Storage in Lakes: Citizens and Satellites Implementation Phase (PI: Pavelsky) This grant funds a program designed to build lake monitoring networks around the world based on citizen science and satellite measurements. Using these networks, we will seek to understand the spatial scales at which lake water storage varies. Dates Active: 6/25/2018-6/24/2022
Pavelsky Effort: 8.3%/yr

(Co-I) NSF Chemical Oceanography $86,768 ($0 to Pavelsky)
Hurricane Harvey Impacts on Local and Landscape Scale Salt Marsh Carbon Storage (PI: J. Cable, UNC, Co-Is: Pavelsky, J. Arriola) This NSF RAPID grant funded work to characterize changes to salt marshes along the coast of the Gulf of Mexico associated with Hurricane Harvey. Pavelsky advised on remote sensing work. Dates Active: 10/1/2017-9/30/2018
Pavelsky Effort: 0%/yr

(PI) NASA Citizen Science for Earth Systems Program Prototype Phase $152,674
Tracking Water Storage in Lakes: Citizens and Satellites (PI: Pavelsky) This grant funded development of a program designed to recruit citizens in eastern North Carolina to measure variations in water level in local natural lakes. These measurements are then combined with satellite-derived measurements of lake area to measure variations in total water storage. If successful, this grant will lead to a 3-year award. Dates Active: 2/1/2017-2/28/2018
Pavelsky Effort: 4.2%

(Co-I) NASA Arctic Boreal Vulnerability Experiment $933,800 (UNC: $156,617)
Sensitivity of Arctic-Boreal surface water to permafrost state (PI: L. Smith, UCLA, Co-Is: Pavelsky, D. Lettenmaier) This grant funds data collection and analysis to understand how permafrost conditions are reflected in variations in water levels across the Canadian and Alaskan Arctic regions. Dates Active: 1/1/2017-12/31/2020
Pavelsky Effort: 4.2%/yr in 2017-2020

(PI) NASA/Jet Propulsion Laboratory $148,492
SWOT Algorithm Team 2016-2018 (PI: Pavelsky) This contract from JPL funded work to develop hydrology algorithms for the SWOT mission, including an algorithm to produce a consistent raster data product from raw SWOT data. Dates Active: 10/01/2016 to 9/30/2018
Pavelsky Effort: 0%

(Co-I) NSF Integrated Food, Energy, and Water Systems $2,958,028 (Pavelsky: $341,579)

The sustainability-productivity tradeoff: Water supply vulnerabilities and adaptation opportunities in California's coupled agricultural and energy sectors (PI: G. Characklis, UNC). This proposal would fund development of an integrated modeling system to assess how climate change and other factors are likely to affect food, energy, and water markets in the Central Valley of California. Pavelsky's role will be to model the future climate of California using a regional climate model. Dates Active: 10/1/2016-9/30/2019
Pavelsky Effort: 8.3% in 2017, 4.2%/yr in 2018-2019

(Co-I) NASA JPL Research & Technology Development $1,160,000 (UNC: $158,571)
Flow of water, carbon, and sediment within the land-sea continuum (PI: M. Simard, JPL). This grant funds work to understand how well we can use remotely sensed data to measure the movement of water, sediment, and carbon through the Mississippi Delta. Dates Active: 10/1/2016-9/30/2019
Pavelsky Effort: 2.1%/yr

(PI) NASA SWOT Science Team $843,980
Improving hydrologic measurements from SWOT with optical satellite imagery (PI: Pavelsky). This grant funds continued work as the hydrology science lead for the SWOT mission, with a particular focus on using optical satellite imagery to improve SWOT hydrology products in the areas of river ice detection, river discharge, and monitoring of inundation extent in rivers. Dates Active: 6/20/2016-6/19/2020
Pavelsky Effort: 22.5%/yr in 2016, 2020; 8.3%/yr in 2017- 2019

(PI) NASA/Jet Propulsion Laboratory $50,000
Hydrologic science from the NASA Surface Water and Ocean Topography Mission II (PI: Pavelsky). This contract from the NASA Jet Propulsion Lab funded research and organizational activities related to the PI's role as the U.S. Lead Hydrologic Scientist for the SWOT mission. Dates Active: 9/16/2015-4/16/2016
Pavelsky Effort: 4.2%/yr

(Co-I) NASA/Jet Propulsion Laboratory $487,560 (UNC: $100,577)
Hydrology Algorithms for the NASA Surface Water and Ocean Topography Mission (PI: M. Durand, Ohio State). This contract from the Jet Propulsion Lab funded development of algorithms for measuring river discharge from SWOT. Dates Active: 9/1/2014-2/28/2016
Pavelsky Effort: 0%

(PI) NASA/Jet Propulsion Laboratory $96,610
Hydrologic science from the NASA Surface Water and Ocean Topography Mission (PI: Pavelsky). This contract from the NASA Jet Propulsion Lab funded research and organizational activities related to the PI's role as the U.S. Lead Hydrologic Scientist for the SWOT mission. Dates Active: 3/26/2014-3/25/2015
Pavelsky Effort: 4.2%/yr

(PI) NASA Terrestrial Hydrology Program $742,042
Airborne imaging of water level and inundation extent in high-latitude hydrologic systems to address SWOT mission science and validation goals (PI: Pavelsky, Co-Is: L. Smith and D.

Moller) This grant uses a new airborne instrument to validate key technology for the SWOT satellite mission and addresses questions regarding how water moves through complex flow environments such as braided rivers and floodplains. Dates Active: 1/1/2013-12/31/2017
Pavelsky Effort: 8.3%/yr

(Co-I) NASA Terrestrial Hydrology Program $573,093 (UNC: $57,956)
Decomposing the water storage signal from basins with varied climates using remote sensing and modeling (PI: R.E. Beighley, Northeastern U.; Co-Is: Pavelsky, H. Lee) This three-year study used a combination of remote sensing observations and hydrologic models to develop estimates of different components of the water cycle in large river basins, including the Amazon, Mackenzie, and Mississippi. Dates Active: 10/1/2012-3/16/2016
Pavelsky Effort: 4.2%/yr

(PI) NASA New (Early Career) Investigator Program $273,723
Analysis of global river width distribution and provision of core knowledge for the SWOT satellite mission (PI: Pavelsky). This grant funded development of a global map of river widths from remotely sensed imagery and analysis of global patterns in river form. In addition, it provided key knowledge to the SWOT mission, a major NASA satellite mission currently under development for launch in 2020. Dates Active: 9/18/2012-12/17/2015
Pavelsky Effort: 8.3%/yr

(PI) NASA Topical Workshops, Symposia, and Conferences $26,979
A workshop on SWOT river discharge algorithms
(PI: Pavelsky) This grant funded a workshop held at UNC in June, 2012 on improving river discharge algorithms from data acquired by the NASA Surface Water Ocean Topography (SWOT) satellite mission. Dates Active: 1/1/2012-12/31/2012
Pavelsky Effort: 4.2%

PROFESSIONAL ACTIVITIES AND SERVICE

Professional Membership: American Geophysical Union (AGU)
Manuscript reviewer: *Science, Proceedings of the National Academy of Sciences, Nature Geoscience, Geophysical Research Letters, Water Resources Research, Journal of Geophysical Research, Reviews of Geophysics, Remote Sensing of Environment, Journal of Hydrology, Journal of Hydrometeorology, IEEE TGRS, IEEE JSTARS, Journal of River Basin Management, International Journal of Remote Sensing, The Journal of Geology, River Research and Applications, PLoS One, Climate Research, Hydrological Processes, Earth-Science Reviews, AGU Books, Environmental Research Letters, Computers and Geosciences, Remote Sensing, Earth's Future, Earth Science Reviews*.
Proposal reviewer: NSF, NASA, NSERC (Canada), U.S. Army Research Office.
Member: AGU Hydrology Section Remote Sensing Technical Committee (2005-2008)
Conference Session Chair/Co-Chair:

- "The SWOT Mission: Oceanography, Hydrology, and Their Interaction at the Estuaries." AGU Fall Meeting, 2020
- "The SWOT Mission: Oceanography, Hydrology, and Their Interaction at the Estuaries." AGU Fall Meeting, 2018

- "Remote Sensing of Rivers and Lakes," AGU Fall Meeting, 2017
- "Science and Applications in Preparation for the Surface Water and Ocean Topography (SWOT) Satellite Mission," AGU Fall Meeting, 2016
- "Remote Sensing of Rivers: Advancing Fluvial Science," AGU Fall Meeting, 2015
- "Remote Sensing of Rivers: Observations Across Scales," AGU Fall Meeting, 2014
- "Recent Advances in Remote Sensing and Modeling in Rivers and Streams for Understanding and Predicting Riverine Dynamics," AGU Fall Meeting, 2011
- "Remote Sensing of Rivers," AGU Fall Meeting, 2010
- "Land, Ocean, and Atmosphere in a Changing Arctic," AAG Annual Meeting, 2010
- "The Carbon and Water Cycles in a Changing Arctic," AAG Annual Meeting, 2008
- "The Changing Arctic" at Association of American Geographers (AAG) Annual Meeting, 2007

International Workshops and Conferences Organized or Co-Organized:

- 9 meetings of the NASA/CNES SWOT Science Team or Science Definition Team between January 2014 and Sept 2021; Each meeting included 80-200 participants, and all were co-organized with Jean-Francois Cretaux, Rosemary Morrow, and Lee-Lueng Fu.
- Workshop on Global Remote Sensing of Inundation Extent, Boulder, CO, May 23-25, 2018, Organized with J. Toby Minear (18 participants, Funding: NASA)
- Symposium on Remote Sensing of Lakes, LEGOS, Toulouse, France, June 1-2, 2017, Organized with Jean-Francois Cretaux (~40 participants, Funding: CNES)
- Workshop on Remote Sensing of River Discharge, UNC Chapel Hill, June 2012 (20 participants, Funding: NASA)

External Review Panel Member, Laboratoire D'Etudes en Geophysique et Oceanographie Spatiales 5 Year Review, Toulouse, France, February 2019.

SERVICE TO THE UNIVERSITY OF NORTH CAROLINA

Oct 2021—Present	Member, EMES Diversity, Equity, and Inclusion Committee
July 2021—Present	Member, EMES Graduate Degrees Taskforce
May 2020—May 2021	Co-Chair, Geological Sciences/Marine Sciences/IMS Merger Committee
Jan. 2019—June 2021	Associate Chair, UNC Department of Geological Sciences
Jan. 2019—June 2021	Member, Dept. of Geol. Sciences Executive Committee
Oct 2018—Feb 2019	Member, New Faculty Search Committee in Environment, Ecology, and Energy Program
Nov 2017—Jan 2018	Member, Search Committee, Director of UNC Institute for the Environment
Oct 2016 – Nov 2016	Member, Dept. of Geo. Sciences Strategic Planning Committee
Apr 2015 – Dec 2016	Member, Provost's Environmental Task Forces
Jul 2013 – Jul 2018	Director of Graduate Admissions, Dept. of Geol. Sciences
Nov 2013 – May 2014	Member, Dept. of Geol. Sciences Executive Committee
Oct 2012 – Mar 2013	Chair, New Faculty Search Committee in Geological Sciences
Jan 2012 – Apr 2014	Member, University Water Theme Steering Committee
Dec 2010 – Sep 2012	Director of Graduate Admissions, Dept. of Geol. Sciences
Oct 2010 – Dec 2016	Member, Faculty Advisory Comm., UNC Inst. for the Environ.
Sep 2010 – Sep 2012	Member, Dept. of Geol. Sciences Executive Committee

Sep 2010 – Sep 2012	Member, Dept. of Geol. Sciences Student Grants Committee
Jan 2009 – May 2010	Chair, Dept. of Geological Sciences Colloquium Committee

INVITED SEMINARS AND COLLOQUIA

Oct. 2021	Appalachian St Department of Earth and Environmental Science
Sept. 2021	NASA/Caltech Jet Propulsion Lab Invited Seminar
Sep. 2020	UNC Department of Marine Sciences Colloquium
Jan. 2020	UCLA Department of Geography Colloquium
Oct. 2019	University of Oregon Department of Geography Seminar Series
Oct. 2018	Laboratoire D'Etudes en Geophysique et Oceanographie Spatiales, France
Nov. 2017	Boston University Seminar Series on Climate Change
Feb. 2017	UCLA Department of Geography Colloquium Series
Mar. 2016	University of Arizona Department of Geosciences
Oct. 2015	Duke University Nicholas School Division of Earth and Ocean Sciences
Apr. 2015	UNC Department of Geography
Mar. 2014	University of Colorado CIRES Special Seminar
Sep. 2014	NASA Goddard Space Flight Center Terrestrial Water Cycle Seminar
Feb. 2014	Duke University Nicholas Institute Seminar on Remote Sensing of Hydrology
Feb. 2013	UNC Royster Society Seminar on Global Water Resources
Oct. 2012	UNC Friday Center for Continuing Education, "What's the Big Idea?" Series
Mar. 2012	Duke University Nicholas School Division of Earth and Ocean Sciences
Sep. 2011	UNC Institute for the Humanities, Seminar on Global Water Resources
Apr. 2011	UNC Charlotte Department of Geology and Geography
Apr. 2011	Duke University Fuqua School of Business, Seminar on Water Markets
Sep. 2010	University of South Carolina Department of Earth and Ocean Sciences
Jul. 2010	Durham University (UK) Department of Geography
Apr. 2010	NC State Department of Marine, Earth, and Atmospheric Sciences
Mar. 2010	Augustana College Institute of Polar Studies and Dept. of Geography
Feb. 2010	UNC Department of Geography
Oct. 2009	UNC Department of Marine Sciences
Apr. 2009	UCLA Department of Civil and Environmental Engineering
